|                                      |                              |                                    |                               |                                     |
|--------------------------------------|------------------------------|------------------------------------|-------------------------------|-------------------------------------|
| "This is why we still do karyotypes" | Deletion                     | "Complementary technologies"       | Chromosome 19                 | "We were surprised by this finding" |
| Pathogenic                           | Robertsonian translocation   | Acute promyelocytic leukemia (APL) | Diagnostic yield              | Chromosome 4                        |
| "It's more complex than it looks"    | Chromosome 6                 | FREE                               | Whole genome sequencing (WGS) | Plasma cell neoplasm                |
| Chromosome 20                        | Acute myeloid leukemia (AML) | Chromosome 3                       | "p-arm"                       | Chromosome 18                       |
| Cell-free DNA (cfDNA)                | Long-read sequencing         | PML::RARA                          | "Unexpected finding"          | Genotype-phenotype correlation      |

Rules: Mark off squares as terms or quotes on your card are mentioned or appear on a slide. Five in a row vertically, horizontally, or diagonally to win. Each game starts at the beginning of each platform session (excluding keynote and vendor talks) and ends when a player has a bingo or at the conclusion of the last talk of that session, whichever comes first. You must audibly say "bingo" to win.
