Optical genome mapping (OGM)	Chromosome 20	Chromosome 1	MYC amplification	Developmental delay
Long-read sequencing	Diagnostic yield	Uniparental disomy (UPD)	Chromosome Y	Chromosome 18
"microarray cannot detect balanced events"	Inversion	FREE	"After multiple attempts..."	SRY-positive
Duplication	B-cell ALL (B-ALL)	Picture of karyotype	"Higher resolution method"	Genotype-phenotype correlation
Chromosome 19	Risk stratification	Translocation	Chromosome 12	Whole genome sequencing (WGS)

Rules: Mark off squares as terms or quotes on your card are mentioned or appear on a slide. Five in a row vertically, horizontally, or diagonally to win. Each game starts at the beginning of each platform session (excluding keynote and vendor talks) and ends when a player has a bingo or at the conclusion of the last talk of that session, whichever comes first. You must audibly say "bingo" to win.
