Myeloid malignancy	Risk stratification	Chromosome 16	MYC amplification	"Not detected by conventional methods"
Variant of uncertain significance (VUS)	"We confirmed it with FISH"	Chromosome 4	Chromosome 5	Chromosome 3
Genotype-phenotype correlation	Chromosome 22	FREE	Acute myeloid leukemia (AML)	Whole genome sequencing (WGS)
"Higher resolution method"	"Higher resolution platform"	Derivative chromosome	Aneuploidy	Chromoanagenesis
Optical genome mapping (OGM)	SNP microarray	Chromosome X	Chromosome Y	"Complementary technologies"

Rules: Mark off squares as terms or quotes on your card are mentioned or appear on a slide. Five in a row vertically, horizontally, or diagonally to win. Each game starts at the beginning of each platform session (excluding keynote and vendor talks) and ends when a player has a bingo or at the conclusion of the last talk of that session, whichever comes first. You must audibly say "bingo" to win.
