Aneuploidy	Homology-mediated repair	MYC amplification	Risk stratification	"Higher resolution method"
Clinical utility	Chromosome 5	Chromosome 12	Chromosomal instability	"Higher resolution platform"
Acute myeloid leukemia (AML)	"A beautiful karyotype"	FREE	"Probably more complexity we can't see"	Inversion
Acute promyelocytic leukemia (APL)	Cell-free DNA (cfDNA)	Genotype-phenotype correlation	Whole genome sequencing (WGS)	"After multiple attempts..."
Chromosome 19	Complex rearrangement	SRY-positive	Circos Plot	"microarray cannot detect balanced events"

Rules: Mark off squares as terms or quotes on your card are mentioned or appear on a slide. Five in a row vertically, horizontally, or diagonally to win. Each game starts at the beginning of each platform session (excluding keynote and vendor talks) and ends when a player has a bingo or at the conclusion of the last talk of that session, whichever comes first. You must audibly say "bingo" to win.
