|                                      |                     |                       |                                |                              |
|--------------------------------------|---------------------|-----------------------|--------------------------------|------------------------------|
| Triploidy                            | Chromosome 18       | Derivative chromosome | Chromosome 12                  | Optical genome mapping (OGM) |
| Chromosome 19                        | "q-arm"             | "Due to time..."      | Chromosome 9                   | Inversion                    |
| Cell-free DNA (cfDNA)                | Tetrasomy 12p       | FREE                  | Plasma cell neoplasm           | SRY-positive                 |
| Chromosomal instability              | Risk stratification | Duplication           | Genotype-phenotype correlation | Myeloid malignancy           |
| "This is why we still do karyotypes" | Chromosome 14       | Placental mosaicism   | Y chromosome material          | Picture of FISH              |

Rules: Mark off squares as terms or quotes on your card are mentioned or appear on a slide. Five in a row vertically, horizontally, or diagonally to win. Each game starts at the beginning of each platform session (excluding keynote and vendor talks) and ends when a player has a bingo or at the conclusion of the last talk of that session, whichever comes first. You must audibly say "bingo" to win.
