|   |   |  |                                    |                             |
|---|---|--|------------------------------------|-----------------------------|
| "Due to time..."                          | Robertsonian translocation              | Chromosome 7                               | Acute myeloid leukemia (AML)       | Clinical utility            |
| Chromosome Y                              | "Higher resolution method"              | "microarray cannot detect balanced events" | MYC amplification                  | Pathogenic                  |
| "This wouldn't have been detected before" | Y chromosome material                   | FREE                                       | "q-arm"                            | Copy number variation (CNV) |
| Chromosome 2                              | Aneuploidy                              | Chromosome 10                              | Chromosome 17                      | Translocation               |
| Picture of FISH                           | Variant of uncertain significance (VUS) | B-cell ALL (B-ALL)                         | Acute promyelocytic leukemia (APL) | SNP microarray              |

Rules: Mark off squares as terms or quotes on your card are mentioned or appear on a slide. Five in a row vertically, horizontally, or diagonally to win. Each game starts at the beginning of each platform session (excluding keynote and vendor talks) and ends when a player has a bingo or at the conclusion of the last talk of that session, whichever comes first. You must audibly say "bingo" to win.
