|                                |   |                       |                         |  |
|--------------------------------|---|-----------------------|-------------------------|--|
| Homology-mediated repair       | "Higher resolution method"                | Chromosome Y          | Chromosomal instability | Long-read sequencing                         |
| Inversion                      | "q-arm"                                   | Cell-free DNA (cfDNA) | Chromosome 21           | PML::RARA                                    |
| Acute myeloid leukemia (AML)   | "This wouldn't have been detected before" | FREE                  | Chromoanagenesis        | Chromosome 17                                |
| Chromosome 1                   | Deletion                                  | Developmental delay   | Pathogenic              | "p-arm"                                      |
| Genotype-phenotype correlation | Copy number variation (CNV)               | Clinical utility      | Chromosome 19           | Deep neural networks / AI / Machine learning |

Rules: Mark off squares as terms or quotes on your card are mentioned or appear on a slide. Five in a row vertically, horizontally, or diagonally to win. Each game starts at the beginning of each platform session (excluding keynote and vendor talks) and ends when a player has a bingo or at the conclusion of the last talk of that session, whichever comes first. You must audibly say "bingo" to win.
