Inversion	Plasma cell neoplasm	Structural variant (SV)	Long-read sequencing	Chromosome 22
Chromosome 12	"Complementary technologies"	Diagnostic yield	Picture of karyotype	"We confirmed it with FISH"
Chromosome X	Optical genome mapping (OGM)	FREE	Triploidy	Chromoanagenesis
NIPS / NIPT	Cell-free DNA (cfDNA)	Acute promyelocytic leukemia (APL)	"Higher resolution method"	"Probably more complexity we can't see"
"Higher resolution platform"	Automated metaphase scanning	"We were surprised by this finding"	Developmental delay	Whole genome sequencing (WGS)

Rules: Mark off squares as terms or quotes on your card are mentioned or appear on a slide. Five in a row vertically, horizontally, or diagonally to win. Each game starts at the beginning of each platform session (excluding keynote and vendor talks) and ends when a player has a bingo or at the conclusion of the last talk of that session, whichever comes first. You must audibly say "bingo" to win.
