|------------------------------|------------------------------|--|-------------------------------------|---|
| Plasma cell neoplasm | Copy number variation (CNV) | Genotype–phenotype correlation | Picture of karyotype | Variant of uncertain significance (VUS) |
| “Complementary technologies” | Optical genome mapping (OGM) | PML::RARA | Circos Plot | Automated metaphase scanning |
| Deletion | Homology-mediated repair | FREE | Chromosome Y | “NGS still doesn’t see this” |
| Risk stratification | “Higher resolution method” | Deep neural networks / AI / Machine learning | Chromosome 19 | SRY-positive |
| Acute myeloid leukemia (AML) | Tetrasomy 12p | Chromosome 10 | “We were surprised by this finding” | Chromosomal instability |

Rules: Mark off squares as terms or quotes on your card are mentioned or appear on a slide. Five in a row vertically, horizontally, or diagonally to win. Each game starts at the beginning of each platform session (excluding keynote and vendor talks) and ends when a player has a bingo or at the conclusion of the last talk of that session, whichever comes first. You must audibly say "bingo" to win.
