|                         |   |                            |                                      |  |
|-------------------------|---|----------------------------|--------------------------------------|--|
| B-cell ALL (B-ALL)      | Chromosome 20                           | "Higher resolution method" | Copy number variation (CNV)          | Whole genome sequencing (WGS)              |
| Inversion               | Diagnostic yield                        | Chromothripsis             | "This is why we still do karyotypes" | "microarray cannot detect balanced events" |
| "A beautiful karyotype" | Variant of uncertain significance (VUS) | FREE                       | Pathogenic                           | Genotype-phenotype correlation             |
| Chromosome 22           | Acute promyelocytic leukemia (APL)      | Uniparental disomy (UPD)   | NIPS / NIPT                          | "Complementary technologies"               |
| SNP microarray          | Cell-free DNA (cfDNA)                   | Chromosomal instability    | Placental mosaicism                  | Mosaicism                                  |

Rules: Mark off squares as terms or quotes on your card are mentioned or appear on a slide. Five in a row vertically, horizontally, or diagonally to win. Each game starts at the beginning of each platform session (excluding keynote and vendor talks) and ends when a player has a bingo or at the conclusion of the last talk of that session, whichever comes first. You must audibly say "bingo" to win.
