Acute myeloid leukemia (AML)	Cell-free DNA (cfDNA)	Uniparental disomy (UPD)	Aneuploidy	Genotype–phenotype correlation
Chromoanagenesis	Copy number variation (CNV)	Placental mosaicism	SRY-positive	Long-read sequencing
“It’s more complex than it looks”	Chromosome 9	FREE	“This is why we still do karyotypes”	Chromosome 3
Robertsonian translocation	Optical genome mapping (OGM)	“Higher resolution method”	“Due to time...”	Myeloid malignancy
Chromosome Y	Duplication	SNP microarray	NIPS / NIPT	Chromosomal instability

Rules: Mark off squares as terms or quotes on your card are mentioned or appear on a slide. Five in a row vertically, horizontally, or diagonally to win. Each game starts at the beginning of each platform session (excluding keynote and vendor talks) and ends when a player has a bingo or at the conclusion of the last talk of that session, whichever comes first. You must audibly say "bingo" to win.
