|                                   |                            |                                    |                                |   |
|-----------------------------------|----------------------------|------------------------------------|--------------------------------|---|
| Chromosome 17                     | Risk stratification        | Triploidy                          | "p-arm"                        | "Complementary technologies"            |
| "It's more complex than it looks" | Chromosome 5               | Acute promyelocytic leukemia (APL) | Copy number variation (CNV)    | Y chromosome material                   |
| Diagnostic yield                  | Chromosome 18              | FREE                               | Complex rearrangement          | Deletion                                |
| NIPS / NIPT                       | Robertsonian translocation | Chromosome 3                       | Genotype-phenotype correlation | "Probably more complexity we can't see" |
| Whole genome sequencing (WGS)     | "q-arm"                    | "After multiple attempts..."       | Chromosome 7                   | Derivative chromosome                   |

Rules: Mark off squares as terms or quotes on your card are mentioned or appear on a slide. Five in a row vertically, horizontally, or diagonally to win. Each game starts at the beginning of each platform session (excluding keynote and vendor talks) and ends when a player has a bingo or at the conclusion of the last talk of that session, whichever comes first. You must audibly say "bingo" to win.
