|                              |                     |  |   |                  |
|------------------------------|---------------------|--|---|------------------|
| Acute myeloid leukemia (AML) | Tetrasomy 12p       | Triploidy                                  | "Unexpected finding"                      | "Due to time..." |
| "q-arm"                      | Chromosome 6        | "microarray cannot detect balanced events" | Acute promyelocytic leukemia (APL)        | Chromosome 22    |
| Chromosome Y                 | Chromoanagenesis    | FREE                                       | Robertsonian translocation                | Chromosome 5     |
| NIPS / NIPT                  | Inversion           | Chromosome 16                              | "This wouldn't have been detected before" | Chromosome 10    |
| Picture of karyotype         | Developmental delay | SNP microarray                             | Chromosome 17                             | Chromosome 11    |

Rules: Mark off squares as terms or quotes on your card are mentioned or appear on a slide. Five in a row vertically, horizontally, or diagonally to win. Each game starts at the beginning of each platform session (excluding keynote and vendor talks) and ends when a player has a bingo or at the conclusion of the last talk of that session, whichever comes first. You must audibly say "bingo" to win.
